📰 PRESS RELEASE

AI-Powered Wealth Advisor Launches to Transform Retail Investing in India

Pune, India — [Future Date]

Today, we are excited to announce the launch of an AI-powered wealth advisor designed specifically for Indian retail investors. This platform helps users make smarter investment decisions through personalized insights, real-time portfolio analysis, and automated recommendations.
Millions of retail investors in India struggle with fragmented portfolios, lack of professional advice, and emotional decision-making. Our platform solves this by acting as an intelligent financial companion — guiding users at every step of their investment journey.
With seamless integration across leading brokerage platforms, users can now:

- Track their entire portfolio in one place
- Understand their risk exposure instantly
- Receive personalized recommendations
- Get alerts for rebalancing and underperformance

"Retail investors deserve access to high-quality financial advice without paying high fees," said the Founder. "Our goal is to democratize wealth creation using AI."
The platform offers a freemium model, with advanced AI advisory features available via subscription.
👉 **Available soon across web and mobile platforms**

❓ FREQUENTLY ASKED QUESTIONS (FAQ)

👤 CUSTOMER FAQ

1. What problem does this solve?
Retail investors lack structured guidance. This leads to poor diversification, emotional decisions, and lower returns.
2. How is this different from Zerodha or Groww?
Platforms like Zerodha and Groww focus on execution.
👉 We focus on **intelligence + advisory layer**
3. What will the AI actually do?

- Explain your portfolio in simple language
- Identify risks (e.g., sector overexposure)
- Suggest rebalancing actions
- Track your financial goals

4. Is this suitable for beginners?
Yes. The platform simplifies investing with clear insights and guided recommendations.
5. What about advanced investors?
They get:

- Consolidated portfolio view
- Deep analytics
- Optimization suggestions

6. Pricing?

- Free: Tracking + basic insights
- Paid: ₹499–₹999/month for AI advisory

🏢 INTERNAL / PRODUCT FAQ

1. What is the core product vision?
👉 Move from **execution platform → intelligent wealth platform**

---

2. What is the MVP? (0–6 months)

- Portfolio tracking
- Risk scoring
- Asset allocation visualization
- Alerts (overexposure, underperformance)

---

3. What comes next?

Phase 2 (6–12 months):

- AI-generated insights
- Personalized recommendations
- Goal-based investing

Phase 3 (12–24 months):

- Autonomous AI advisor
- Auto-rebalancing (with user approval)
- Predictive analytics

---

4. How does AI work here?

Generative AI (Insight Layer):

- Portfolio explanations
- Weekly summaries
- Risk insights

Agentic AI (Action Layer):

- Continuous monitoring
- Rebalancing suggestions
- Goal tracking

---

5. What is the business model?

- Subscription (₹499–₹999/month)
- Future: % of AUM
- B2B partnerships with brokers

---

6. What are the key success metrics?

North Star:

- Improvement in risk-adjusted returns

Supporting:

- DAU / Retention
- AUM growth
- Feature adoption
- Diversification score

---

7. What are the biggest risks?

Regulatory (SEBI):

→ Compliance-first design

Trust:

→ Explainable AI + human override

Data Privacy:

→ Secure APIs + encryption

---

8. Why will this succeed now?

- Explosion in retail investors
- Shift to digital investing
- AI maturity enabling personalization

---

9. Go-To-Market Strategy
Phase 1: DIY investors (Zerodha, Groww users)
Phase 2: Content-led growth (YouTube, Instagram)
Phase 3: Broker partnerships

---

10. High-Level Architecture

- Broker API integrations
- Data pipeline (portfolio aggregation)
- AI layer (LLMs + analytics engine)
- Web/mobile dashboard

🎯 **FINAL TAKEAWAY**

- Strong problem (lack of advisory)
- Massive market opportunity
- AI enables scalable personalization
- Clear roadmap:
  👉 Insights → Recommendations → Automation → Autonomy
